INTRODUCTION

Numbers Count is an Every Child Counts intervention for children who have the greatest difficulties with mathematics. It helps them to make greater progress towards expected levels of attainment so that they will catch up with their peers. It has two versions:

- Numbers Count 1 is designed mainly for children in Years 1 to 3;
- Numbers Count 2 is designed mainly for children in Years 4 to 9.

In both interventions, children normally have daily, 30-minute lessons with a specially-trained Numbers Count teacher in addition to continuing to take part in their normal class mathematics lessons. Accredited Numbers Count teachers decide whether to deliver each lesson individually or to two or three children together, according to the children's needs and the circumstances of the school. Teachers who are in training deliver all lessons individually.

Numbers Count lessons take place in a dedicated teaching area where children can use a wide variety of resources. The teacher begins by making a detailed diagnostic assessment of what each child knows and then plans an individualised programme of lessons for what each one needs to learn next: no two children follow the same programme. Lessons focus on number and calculation, follow a set routine and are rigorous and active. The teacher aims to help each child to become numerate and confident, to enjoy actively learning mathematics and to develop the skills and positive attitudes needed to continue to make good progress in normal class mathematics lessons after completing his or her Numbers Count programme.

A Numbers Count teacher normally teaches several children every morning or afternoon, liaising closely with class teachers to review and plan together for the children's progress. The teacher sets regular homework and meets parents to discuss how they can support their children's learning at home. The teacher undertakes a specialised professional development programme to learn about Numbers Count and about effective methods for teaching number and calculation.

Numbers Count was devised by Edge Hill University as a part of its not-for-profit Every Child Counts programme, through which the University has supported over 6,000 schools to raise more than 140,000 children's achievement in mathematics and literacy. All Numbers Count teachers are trained and supported by local Every Child Counts Trainers, who in turn are trained and supported by Edge Hill University National Advisers.

This report is based on data submitted by schools to the University's online data collection and analysis system. Its purpose is to inform evaluations of the effectiveness of the intervention. The level of detail in the tables depends on the data supplied and the time of year. If you have any queries, please contact the ECC team.

1. PARTICIPATION IN THE PROGRAMME

Numbers Count is designed for pupils in Years 1 to 9 who have the greatest difficulties with mathematics.

2. LESSONS

A pupil's Numbers Count programme normally lasts for at least 40 lessons, including an assessment phase and a teaching phase. Assessment lessons and all lessons taught by new teachers in training are delivered 1-to-1. Accredited teachers decide whether teaching should be delivered 1-to-1, 1-to-2 or 1-to-3 to match the needs of the pupils and the circumstances of the school.

3. TEST OUTCOMES

Schools are encouraged to test pupils' mathematics when they enter and exit from the programme. Entry testing helps to identify their initial attainment and learning needs and exit testing provides an objective measure of the progress that they have made.

TABLE 3.1 shows outcomes calculated by schools or approximate outcomes calculated by Edge Hill University based on raw data reported by schools.

Age	<i>A pupil's chronological age at the time of their entry and exit tests.</i>
Number Age	<i>A Number Age is the average age of pupils across the country who achieved the same test score as the pupil.</i>
Standard Score	<i>A Standard Score compare's a pupil's test score with those of other pupils of the same age across the country. A Standard Score close to 100 is 'average' and 84% of all pupils have a Standard Score of at least 85.</i>

4. ATTITUDES TO MATHEMATICS

When pupils have completed the programme, their class teachers can assess the attitudes that they show in class towards mathematics. The teachers use an Every Child Counts Attitude Survey to report on 8 aspects of each pupil's attitude, such as taking an active part in lessons, concentration and willingness to 'have a go' without asking for help. For each aspect, they decide whether the pupil is now more positive, about the same, or less positive than before taking part in Numbers Count.

	Pupils	Percent
<i>Number of pupils</i>	1,138	
Pupils who were more positive after the programme	1,073	94%
Pupils whose attitudes did not change	48	4%
Pupils who were less positive after the programme	17	1%
Net gain	1,056	93%

pupils who completed a programme and for whom an Attitude Survey was reported

5. END OF YEAR ASSESSMENTS

If pupils complete their programmes before the end of May, schools can use a follow-up test at the end of the year to measure their progress since exiting the programme and over the year as a whole.

TABLE 5.1 shows outcomes calculated by schools or approximate outcomes calculated by Edge Hill University based on raw data reported by schools.

6. PUPIL CHARACTERISTICS

TABLE 6.1 analyses pupils' participation and outcomes in relation to their background characteristics. It is designed to help schools to monitor the progress of relevant vulnerable groups.
