

Highly effective Every Child Counts TA led Mathematics intervention programmes – New Courses starting January 2019

Dear All,

Kingsmead Primary School will be providing new courses in the highly effective Every Child Counts (ECC) TA led small group Mathematics intervention programmes: **1stClass@Number** and **Success@Arithmetic** starting from around **mid-January 2019** (Dates to be finalised).

These TA led programmes have a very high impact on pupil attainment with **over 120,000 children from Year 1 to Year 7 having made an average of 13 to 17 months progress in a term**. The Every Child Counts (ECC) programmes enable children to catch up so they can continue to learn effectively with their peers.

All programmes come with extensive face to face professional development which equips the TAs and Teachers involved to not only deliver the programme but to be more effective and confident in supporting Mathematical learning in any context.

We will be offering 4 ECC programmes this January

- **Becoming 1stClass@Number** – for children in Year 1 (and beyond) who need to secure the early learning goals in Mathematics.
- **1stClass@Number 1** – For Children in Year 2 and beyond who need to master the Year 1 Maths objectives.
- **1stClass@Number 2** – for children in Year 2 and beyond who need to master the Year 2 Maths objectives.
- **Success@Arithmetic: Number Sense** – for children in Year 3 and beyond who need to develop mastery of the number fact and times table knowledge, derivation strategies, deep place value understanding, reasoning and problem solving skills needed to master written calculation and the upper KS2 curriculum.

The ECC programmes are hands on and talk based emphasising the development of reasoning, problem solving and metacognitive talk as well as teaching the fundamentals of Mathematics. They come with extensive profession development spread over around a tern, all the lesson plans, guidance and specialist resources needed to run the programme, and 1 year of email and phone support and access to our secure data analysis and resources website.

The cost to train a TA and Teacher together is £990 for any of the courses.

Further Information

I have attached flyers and our SLAs (booking forms) for further information.

NB: Courses are usually held at Kingsmead School, London E9 5PP, but I'm happy to run courses at venues local to you if viable)

Any Questions

If you would like to know more, please contact me via email or phon. I'll be happy to help.

Booking Places

If you would like to book any staff onto any course, please fill in the booking form (service level agreement) attached and return it to me electronically. All courses are first come first served.

Best wishes

Garry
